Dear Automation Professional:

The International Society of Automation is a leading, global, non-profit organization that is setting the standard for automation by helping over 30,000 worldwide members and other professionals solve difficult technical problems, while enhancing their leadership and personal career capabilities. Based in Research Triangle Park, North Carolina, ISA develops standards, certifies industry professionals, provides education and training, publishes books and technical articles, and hosts conferences and exhibitions for automation professionals.

The Accreditation Board for Engineering and Technology (ABET) accredits curricula and assists academic institutions plan educational programs leading to degrees for engineers, engineering technologists, engineering technicians, and others engaged in engineering work. ISA is ABET’s lead Society for accreditation of engineering and technology programs that include “instrument,” “instrumentation,” “measurement,” “metrology,” “control,” “automation,” or similar modifiers in their titles.

ISA has reviewed the curricula of the courses offered by the Engineering Institute of Technology (EIT) as they relate to the instrumentation, control and automation discipline and are enthusiastic about promoting their availability to the automation community.

Sincerely,

Patrick J. Gouhin
Executive Director and CEO
