EIT Facilities

There are a number of different facilities provided by the EIT at our West Perth campus. Obviously our focus is on outstanding delivery of our courses through distance learning; hence the IT infrastructure and course delivery software is absolutely critical. The facilities are briefly outlined below and include:

A large classroom
The EIT has a large classroom and is leading the industry in terms of teaching and technology, with access to its remote labs from within the classroom. The classroom facilities include:

- Data Projector
- Computer – linked to the network
- Wireless network
- Microphones – attached to the computer
- Two whiteboards and flipcharts
- Associated kitchen facilities and meeting area

Meeting Area
The EIT has a large space in the company offices for meetings and presentations.

Library
The EIT has a growing collection of 2000 engineering books and engineering standards in its library (in either hard copy or electronic format). The librarian can be consulted for details of any books required by students, who will be required to fill in a book register if they want to take books or other publications off the campus premises.

IDC Technologies Engineering Books
The sister company of the EIT, IDC Technologies, publishes a great range of over 200 engineering textbooks for its courses. The Publisher can be consulted for details of any books a student may require, which are all accessible from any computer within our offices.
Remote Laboratories (labs)

The EIT has access to 20 different remote labs set up in the premises in West Perth. These can easily be accessed by consulting the IT Manager. The current labs range from instrumentation, electrical engineering, industrial data communications and operate 24x7. The labs are accessed from throughout the world using the Electromeet software package.

Kitchen Facilities

There is a modern kitchen for the benefit of staff and students. The kitchen is spacious and allows students freedom to access full cooking facilities and coffee/tea.

Parking

The EIT provides parking at the campus in West Perth for students. Parking permits are issued to students on campus and these are obtainable from the Accreditation Manager. A parking permit entitles a person to park in a designated car parking space only, in keeping with the conditions of the permit held. It should be understood that during periods of peak demand there could be insufficient parking spaces on the campus in close proximity to major buildings; so students may be required to double park. Students can consult the Accreditation Manager for details. Students are requested to plan ahead and arrive early enough to find a suitable parking space.

It is of the utmost importance that vehicles are not parked on grassed areas, footpaths, roadways, car park access roads and the like for the protection of the EIT’s environment, and for the safety of students, staff and visitors.

There is two large City of Perth parking facilities a few hundred metres away from the West Perth campus.
