Information Literacy and Resource Access Policy

Policy/Document Approval Body: Academic Board
Date Created: 3rd February 2009
Policy Custodian: Dean of Engineering
Policy Contact: Accreditation Manager
File Location: W:\Data - ALL.Standard\Policies and Procedures\EIT Policies and Procedures
Location on EIT website: http://www.eit.edu.au/organisation-policies

Definitions:
Information literacy: Information literacy enables individuals to recognise when information is needed and how to locate, evaluate and use information effectively. It is a prerequisite for lifelong learning.

Review Period: Three years
Revision No: 6
Date of Revision: 13th October 2010

Purpose: The purpose of this policy is to define the term information literacy and to clarify how all students at the EIT develop these skills and access resources.

Scope: This policy applies to undergraduate and postgraduate students, academic teaching staff, and general staff involved in supporting the development by students of generic attributes.

Essential Supporting Documents:
Australian and New Zealand Information Literacy Framework
http://www.anzil.org/resources/info_lit_2ndedition.pdf
Policy on the Generic Attributes of Graduates

Related Documents:
- Teaching and Learning Resources Policy – Development and Review
- Identification and Support for Students at Risk - Policy and Procedures
- Student Learning and Feedback Assessment Policy
All students at the EIT will be supported in developing information literacy (skills). This policy establishes a model for embedding information literacy into the academic curriculum of the EIT, articulating the role and responsibilities of the EIT’s key contributors to the development of information literate graduates, and working toward establishing consultative and reporting mechanisms for stakeholders.

Information literacy is required within problem-solving skills, but it also underpins knowledge attributes and communication skills. The EIT requires all students to graduate with a set of generic attributes that include:

- Knowledge
- Communication Skills
- Problem-solving skills
- Global Perspective
- Social Responsibility

Information literate graduates of the EIT will be able to:

- Recognise a need for information
- Determine the extent of information needed
- Access information efficiently
- Critically evaluate information and its sources
- Classify, store, manipulate and redraft information collected or generated
- Incorporate selected information into their knowledge base
- Use information effectively to learn, create new knowledge, solve problems and make decisions
- Understand economic, legal, social and cultural issues in the use of information
- Access and use information ethically and legally
- Use information and knowledge for participative citizenship and social responsibility
- Experience information literacy as part of independent learning and lifelong learning.

**Stakeholders in Policy Provision**

The development of information literate graduates is a shared responsibility. Key partners in this enterprise will be EIT academic staff, the EIT librarian, and students. These partners can work together to embed information literacy programmes into the curriculum.

While the library will have a leadership role in the development of information literate graduates, the effective embedding of information literacy programmes within the mainstream of the learning process requires close co-operation between all stakeholders.

**Roles and responsibilities**

**The EIT Librarian**

The role of the EIT librarian is to:

- Provide leadership in policy formulation and planning for information literacy within the Institute.
• Work with partners to monitor international and national trends in information literacy training, and benchmark these against the information literacy programmes of the Institute.

• Advocate to the Dean and the Academic Board the embedding of information literacy into the curriculum within the context of graduate attributes.

• Work to develop a sustainable training and support model for academic staff in the area of information literacy.

• Work with academic staff to integrate information literacy objectives into course curriculum and Unit outlines and content.

• Develop, promote and deliver information literacy training and support to the academic and student communities.

• Works with partners to evaluate the quality and effectiveness of the information literacy programmes of the EIT.

The Dean and the Academic Board
The role of the Dean and the Academic Board is to:

• Oversee the incorporation of information literacy skills into all EIT courses/programs as a component of graduate attributes.

• Promote the inclusion of information literacy objectives into relevant course curriculum and Unit outlines, in the context of graduate attributes.

• Report to the Academic Board on how programmes develop information literacy skills within the context of graduate attributes.

Academic staff
The role of academic staff is to:

• Work with the EIT Library and the Dean to develop information literacy programmes that are relevant to course curriculum and Unit outcomes.

• Where appropriate, incorporate information literacy objectives into Unit outlines, in the context of graduate attributes.

Students
The role of students is to monitor and record their development with regard to information literacy skills as a component of mapping their development of graduate attributes.
