

Welcome to this webinar with Dr Steve Mackay ^{RH}

There are at least 3 ways to interact with your presenter today.

1. Use the **Text** tab, near bottom left of your screen. Type the message in the space next to the "Send" button, then enter or click Send. (Ensure "All" is selected in the drop-down menu under the typing area)

2. Use the **Emoticons** selection in the text window – choose an emoticon then click send or enter.

3. **Talk!** Click the **Push To Talk** button. The button will change to yellow when you are queued, then green to show that your microphone is live.

Remember to click it again when you have spoken

This 45 minute session will commence shortly

Can't hear us ?

- Please configure your audio by going to the **TOOLS** menu, then **AUDIO SETUP WIZARD** – and follow the steps ☺
- If you are having problems with your microphone, don't worry – as long as you can hear the presentation that's OK – you can communicate with the text box. However, after the session we recommend you chat let us know so that we can help you.
- If you are having trouble with your speakers, and can't hear anything – and have tried the Audio Wizard – don't worry. We will be recording the session, so you will get to view a recording.
- We hope you enjoy the session, we will be starting in the next slide

News & Events

Recognition, endorsement and/or accreditation from

Engineers Ireland | IEE | ACPET | Institute of Management and Quality Development

Welcome to the Engineering Institute of Technology (EIT)

The Engineering Institute of Technology (EIT) provides endorsed engineering Diplomas and Certificates (Masters Degrees accreditation pending), designed for students working in industry who need a practical, relevant education that is delivered efficiently. Our students work in the fast-moving engineering and technology fields where time is precious. They choose the EIT online delivery because it provides many of the benefits of live classroom based study without the inconvenience of travel. EIT courses are run by expert instructors who present in a friendly, interactive manner.

The EIT offers engineering Diplomas and Certificates (Masters Degrees accreditation pending) in the areas of:

Introduction

www.eit.edu.au

EIT ENGINEERING
INSTITUTE OF
TECHNOLOGY

DSP

- Digital - finite set of distinct values.
- Analog - continuous range of values.
- DSP Processing means processing of signals which are:
 - Discrete in time.
 - Discrete in amplitude.

www.eit.edu.au

EIT ENGINEERING
INSTITUTE OF
TECHNOLOGY

Two sources of discrete signals

- Ones that are discrete in nature.
- Sampled version of a continuous-time signal.

www.eit.edu.au

Why Process Signals Digitally?

- The signals are inherently discrete in nature.
- Consistency -- compared with analog methods.

www.eit.edu.au

Definition of Terms

- **Signals.** A quantity that can be measured over time.
- **Frequency.** A signal is said to have a frequency of 50 or 60 Hz.
- **Spectrum.** Some signals have a combination of frequencies.

www.eit.edu.au

- **Low Pass Filter.** This lets through the low pass component.
- **Bandpass Filter.** Only a range of frequencies is passed through intact.
- **High-pass Filter.** Allows frequencies above a certain frequency to pass through intact.

www.eit.edu.au

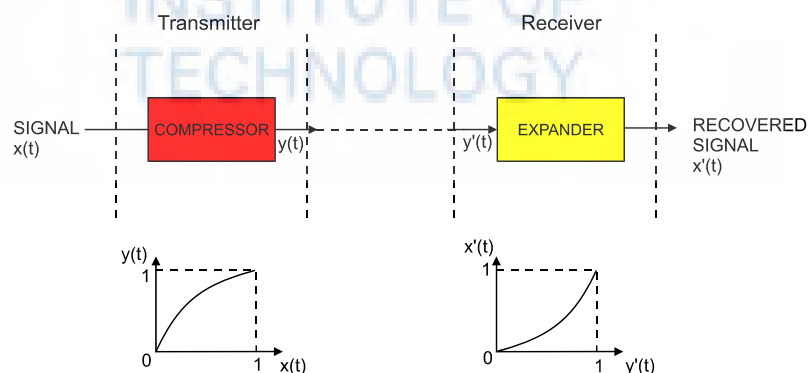

Some Application Areas

- **Speech and Audio Processing.**
 - Coding.
 - Synthesis.
 - Recognition.

www.eit.edu.au

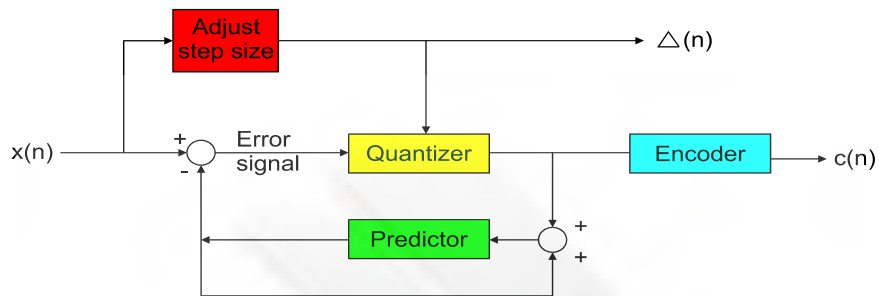

Comping Process

www.eit.edu.au

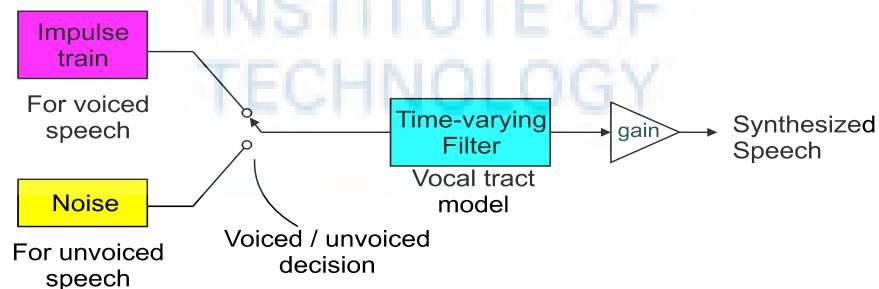

Adaptive Differential Pulse Code Modulator

www.eit.edu.au

Linear Predictive Coding

www.eit.edu.au

Image and Video Processing

- Image Enhancement.
- Image Restoration.
- Image Compression and Coding.

www.eit.edu.au

Adaptive Filtering

- Noise Cancellation.
- Echo Cancellation.
- Channel Equalisation.

www.eit.edu.au

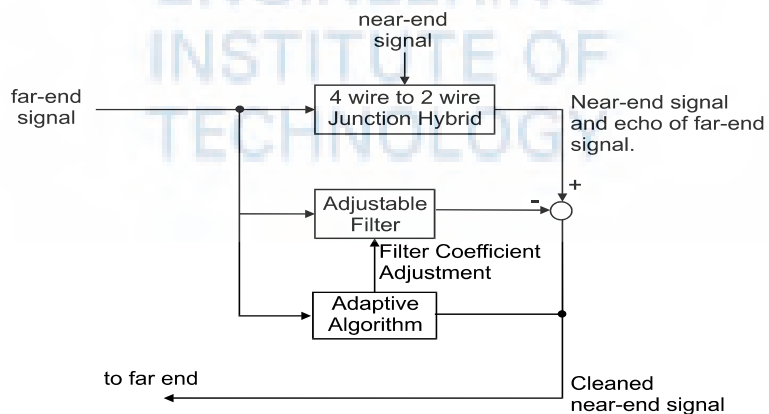

Adaptive Noise Cancellation System

www.eit.edu.au

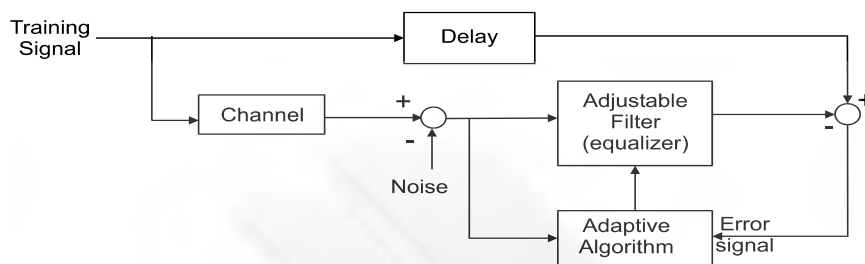

Adaptive Echo Cancellation System

www.eit.edu.au

Adaptive Equalizer in Training Mode

www.eit.edu.au

Control Applications

- Controlling closed-loop feedback systems.
- Controller implements algebraic algorithms such as filters and compensators.

www.eit.edu.au

Digital Closed Loop Control System

www.eit.edu.au

EIT ENGINEERING
INSTITUTE OF
TECHNOLOGY

Sensor or Antenna Array Processing

- Spatially distributed sensors are used for receiving signals from some sources.
- Coherent summing of outputs from these sensors referred to as beamforming.
- One can “listen” preferentially to wavefronts originating from one direction over another.

www.eit.edu.au

EIT ENGINEERING
INSTITUTE OF
TECHNOLOGY

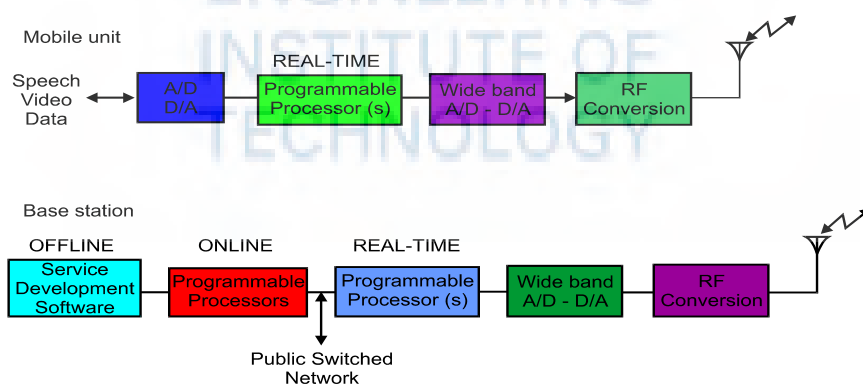

Digital Communication

- New Architecture called software radio.
- Use of wideband A/D and D/A converters to convert RF or IF signals directly.

www.eit.edu.au

EIT ENGINEERING INSTITUTE OF TECHNOLOGY

Software Radio Architecture

Note: Hardware is simple and functions are software-defined

Converting Analog to Digital Signals and Vice Versa

www.eit.edu.au

EIT ENGINEERING
INSTITUTE OF
TECHNOLOGY 

A Typical DSP System

- Three stages
 - The analog signal is digitized. This involves
 - sampling,
 - quantization.
 - Digital signal processed by DSP algorithms.
 - Outputs converted back into analog signals.

www.eit.edu.au

Temperature Variation in a Day

www.eit.edu.au

The Sampling Process

www.eit.edu.au

EIT ENGINEERING
INSTITUTE OF
TECHNOLOGY

Uniform Sampling Theorem

- If a continuous time signal contains no frequency components higher than W Hz, then it can be completely determined by uniform samples taken at a rate f_s samples per second where $f_s \geq 2W$

- or, in terms of the sampling period

$$T \leq \frac{1}{2W}$$

www.eit.edu.au

EIT ENGINEERING
INSTITUTE OF
TECHNOLOGY

Two Bandlimited Spectra

(a) a low-pass spectrum

(b) a band-pass spectrum

www.eit.edu.au

Replication of Spectrum through Sampling

www.eit.edu.au

Replicated Spectrum

www.eit.edu.au

Aliasing

www.eit.edu.au

Sampling at Different Rates

www.eit.edu.au

Effect of Aliasing

www.eit.edu.au

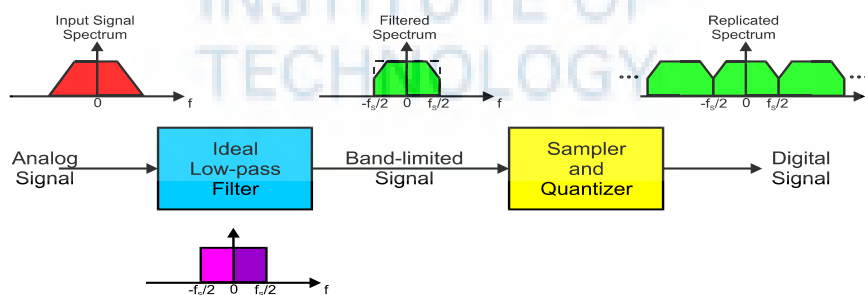

Anti-aliasing Filters

- Process the signal before it is sampled so they are always analog filters.
- Usually low-pass filters unless bandpass sampling techniques are used.

www.eit.edu.au

EIT ENGINEERING INSTITUTE OF TECHNOLOGY

Analog-to-Digital Conversion with Anti-alias Filtering

www.eit.edu.au

EIT ENGINEERING INSTITUTE OF TECHNOLOGY

Implications of Non-ideal Anti-alias Filters

- Sample at higher than Nyquist rate.
- If sampling rate cannot be changed, then a filter with sharper cut-off (implying a higher order filter) has to be used.

www.eit.edu.au

Limits on Sampling Rates

- Practical choice of sampling rate is determined by two factors:
 - Sampling theorem places lower bound on the allowed values of sampling frequency.
 - Economics of hardware imposes upper bound on sampling frequency.
